

KITCHEN CONDENSING BOILER

MINNY

CONDENSING BOILER
ELECTRONIC CONTROL
FULLY EQUIPPED
SYSTEM BOILER
POWER OPTIONS: 20 and 30 kW

The most advanced technology
at the most reasonable price

ECOLOGICAL AND LOW CONSUMPTION

The Minny boiler allows us to reduce CO₂ emissions and to reduce the consumption by using the condensation technology.

The gas temperature must be reduced below the dew point in order to take advantage of the condensation effect. This gas temperature reduction is achieved by the stainless steel condensing unit.

EASE OF INSTALLATION

The boiler is designed to be functional for the professional. Its reduced size, its multidirectional hydraulic connections and being fully equipped allows it to be installed anywhere quickly and easily. As it doesn't use air from the room, it can be used in rooms without ventilation, therefore making its placement simple.

EASY MAINTENANCE

Due to its special design, which allows easy cleaning as well as the changing of any part from the front of the boiler, reduces maintenance costs.

SILENT

The robust acoustic insulation around the heat exchanger and outside panels, as well as the use of a room sealed burner, makes this boiler one of the quietest in the market.

EQUIPMENT

Check valve	Empty valve
Heating pump	Room sealed burner
Pressure Transducer	Telephone relee connection
Safety Valve	Pump anti block
Automatic air vent	Minimum pressure limiter
Heating expansion vessel	Antifreeze
Condensing boiler	Electric connection for cylinder
Condensate drain	

OPTIONS

MyDOMO remote WIFI control
E20 remote control
Outdoor sensor for E20
Sensor for cylinder

CHARACTERISTICS
